*Sculpture Artists*

Richard Warrington

## Richard Warrington

In 2010 Richard was selected by Kennedy Publishing to have his work published in : Best of America Sculpture Artist -Volume 2 which was quite an honor !

For over 40 years impressionistic sculptor, Richard Warrington has designed two and three dimensional original and limited edition hollow form and silhouette sculptures. His designs emulate an outpouring of emotional and spiritual response to his daily environment and relationships. His simple forms work as a unit entwined and playing off each other, sometimes whimsically, other times dramatically.

Line, form, balance and strong composition hallmark Richard's work as well as color, buffed finishes and extreme attention to detail. Powder coated aluminum is his preferred medium, but he also works in stainless, bronze and Corten steel.

Sizes range from tabletop to monumental and are suitable for corporate settings, residences, gardens and public art. He specializes in site specific commission work.

Richard's education includes fine arts at Eastern Washington University and a degree in Advertising and Design from Spokane Falls Community College.
